Hard-One™

SILDENAFIL + DAPOXETINE

SILDENAFIL + DAPOXETINE is a combination of two medicines: **SILDENAFIL** and **DAPOXETINE**, which treats male erectile dysfunction and premature ejaculation.

SILDENAFIL works by increasing blood flow to the penis during sexual stimulation and enables its erection following sexual stimulation.

DAPOXETINE increases the level of serotonin in nerves to increase the time taken to ejaculate and improve control over ejaculation.

Composition :

Each Film Coated Tablet contain

Sildenafil citrate

Equivalent to Sildenafil 100 mg.

Dapoxetine Hydrochloride 60 mg.

Colour : Black Oxide of Iron / Ponceau 4R / Gold

Storage : Kepp In a Cool, Dark and Dry Place

Code No. : UK / Drugs / 44/UA/2010
